DOCUMENT RESUME

ED 307 546 CG 021 716

AUTHOR	Martyniuk, Joy S.
TITLE	Adolescent Suicide. January 1986 through June 1988. Current Bibliographies in Medicine.
INSTITUTION	National Library of Medicine (DHHS/NIH), Bethesda, Md.
REPORT NO	CBM-88-7
PUB DATE	Jun 88
NOTE	32p.; Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (Stock No. 817-004-00007-5, $2.00).
PUB TYPE	Reference Materials - Bibliographies (131)
EDRS PRICE	MF01/PC02 Plus Postage.
DESCRIPTORS	*Adolescents; *Cultural Differences; Death; Ethnic Groups; Family (Sociological Unit); Hospitals; Intervention; Prediction; Prevention; Research and Development; School Role; *Suicide; Television
IDENTIFIERS	*Adolescent Suicide

ABSTRACT

This bibliography contains selected references to worldwide publications dealing with suicide or attempted suicide in adolescents. It consists of references to journal articles, books, dissertations, conference papers, letters, and editorials. The citations were extracted through searches of the literature of various disciplines (medicine, education, the social sciences, sociology, psychology, mental health, law, and family relations). The 475 citations are arranged under 15 broad subject categories: (1) General; (2) Groups: United States; (3) Groups (Countries, Ethnic, or Cultural Groups): Others; (4) Assessment and Prediction; (5) Prevention, Intervention, and Management; (6) Research or Analytical Studies; (7) Epidemiological Studies; (8) Psychological and Psychiatric Aspects; (9) Family; (10) School; (11) Hospitals; (12) Television; (13) Methods Used for Suicide Attempts: Overdoses, Poisoning, Ingestion of Substance; (14) Methods Used for Suicide Attempts: Others; and (15) Autopsy Findings. A citation may appear in only one category. (NB)

SERIES NOTE

Current Bibliographies in Medicine (CBM) is a continuation in part of the National Library of Medicine's Literature Search Series, which ceased in 1987 with No. 87-15. Each bibliography in the new series covers a distinct subject area of biomedicine and is intended to fulfill a current awareness function. Citations are usually derived from searching a variety of online databases. NLM databases utilized include MEDLINE, AVLINE, BIOETHICSLINE, CANCERLIT, CATLINE, HEALTH, POPLINE, AND TOXLINE. The only criterion for the inclusion of a particular published work is its relevance to the topic being presented; the format, ownership, or location of the material are not considered.

Comments and suggestions on this series may be addressed to:

Ordering Information:

Current Bibliographies in Medicine is sold by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. To order the entire CBM series (approximately 20 bibliographies/year), send $26.00 ($33.50 foreign) to the Superintendent of Documents citing GPO List ID: CBM88. Orders for individual bibliographies in the series ($2.00, $2.50 foreign) should be sent to the Superintendent of Documents citing the GPO Stock No. printed on the title page.

Use of funds for printing this periodical has been approved by the Director of the Office of Management and Budget through September 30, 1988.

ADOLESCENT SUICIDE

It was reported in 1986 that over the previous 30 years, the adolescent population in the United States was the only age group that had not enjoyed an improvement in health status. Communicable diseases, once the collective primary cause of death among juveniles, have now been overtaken by violence through accidents, homicide, and suicide. Of these, suicide is now the third leading cause of death in adolescents (the second among young adults).

Currently, certain trends pertain to adolescent suicide, i.e., no race or socioeconomic group is exempt; for every completed suicide, there are 50-200 attempts; boys are more likely to complete suicide acts than girls; boys tend to use more lethal methods that are not amenable to rescue; girls tend to use pills more often. A recent phenomenon has been "cluster suicides," for which the media, and specifically television, may have some influence in precipitating imitative behavior in vulnerable individuals.

Various at risk characteristics have been identified--drug use, family disruption, depression, social isolation, self-destructive behavior, among others--that derive from adverse elements of the behavioral and social environments in which susceptible adolescents find themselves. Efforts are now being made by scientists in various disciplines to study all aspects of the problem of self destruction by children in their adolescent years.

This bibliography contains selected references to worldwide publications dealing with suicide or attempted suicide in adolescents. It consists of references to journal articles, books, dissertations, conference papers, letters, and editorials. The citations were extracted through searches of the literature of various disciplines, i.e., medicine; education; the social sciences in general and sociology, psychology, and mental health in particular; law; and family relations. Arrangement of the bibliography is by fifteen broad subject categories; a citation may appear in only one category.

The reader is also referred to the following related publication from the Library's Literature Search Series: No. 87-5 *Depression and Suicide in Childhood* (January 1983 through April 1987, 337 citations).

SEARCH STRATEGY

A variety of online databases are usually searched in preparing bibliographies in the CBM series. To assist you in updating or otherwise manipulating the material in this search, the strategy used for the NLM's MEDLINE database is given below. Please note that the search strategies presented here differ from individual demand searches in that they are generally broadly formulated and irrelevant citations edited out prior to printing.

SS 1 = EXP *F3.126.918

SS 2 = ALL ADOLESCEN:

SS 3 = (TW) ALL TEEN:

SS 4 = 2 OR 3

SS 5 = 1 AND 4

SAMPLE CITATIONS

Citations in this bibliographic series are formatted according to the rules established for *Index Medicus*. Sample journal and monograph citations appear below. For journal articles written in a foreign language, the English translation of the title is placed in brackets and the language of publication is shown by a three letter abbreviation appearing at the end of the citation. Note also that a colon (:) may appear within an author's name. The NLM computer system automatically inserts this symbol in the place of a diacritical mark.

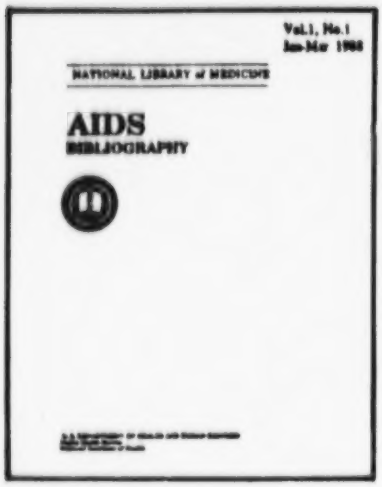
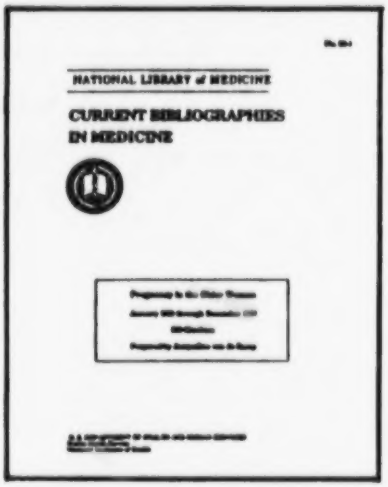
Mail Entire Order Form To: Superintendent of Documents, Washington, D.C. 20402-9371

The National Library of Medicine Announces Two New Subscription Titles



☐ *AIDS Bibliography* *
$12 per year (4 Quarterly issues)
Individual issues $3 per copy
List ID: AID 88

Previously published within NLM's Literature Search Series. Each issue consists of about 60 pages of recent references to journal articles and books on AIDS.



☐ *Current Bibliographies in Medicine* *
$26 per year (Approx. 20 Titles/yr.)
Individual issues $2 per copy
List ID: CBM 88

A continuation of the Library's Literature Search Series, which ended in 1987. Topics will continue to be chosen for their current popular interest in distinct subject areas of biomedicine (excluding AIDS).

*Subscribers receive all issues for a given calendar year without regard to the date of order.
